Sustainability

The Zuiver Group has taken first significant steps towards sustainability. The biggest effect is designing a high-quality collection that lasts from generation to generation, sourcing the most sustainable materials and production methods. Next to this, our global HQ is generating 30% of its own energy through solar panels, and within 5 years we aim for this to be 100%; we encourage all our manufactures to use recyclable packaging materials and to reduce the use of virgin plastics and Styrofoam.
